

Introducing

Since 1935, American Tire Distributors (ATD) has been helping dealers nationwide get their auto aftermarket parts and tires delivered. We've always focused on ensuring shop owners have what they need when they need it. As shop owners continue to react to the evolving market and the ever-changing habits of their customers, we saw the opportunity for a new solution. That's where the idea for Radius was forged. Radius integrates tires, parts, services, and solutions into one connected experience for the auto aftermarket. With Radius, the potential for auto shops is limitless, and this is just the beginning.

Radius drives what's next >>>

Radius drives **choice**

by bringing together products from auto aftermarket distributors. Now you can effortlessly compare features and prices from one centralized hub.

Radius drives **growth**

with easy-to-use tools and the support you need, along with a motivating rewards program.

Radius drives **speed**

by putting real-time data analytics at your fingertips. Now, you'll have the transparency you need to make the right decisions for your customers, the inventory you carry, and your business.
