

## **Cojali USA to present in AAPEX 2023 the latest Innovations in its Vehicle Connectivity and All-Makes Diagnostics Solutions**

**Miami FL, August 3 - Cojali Group**, leading company in the development of diagnostics software and technological solutions for commercial vehicles, agricultural and construction machinery, will be exhibiting in AAPEX 2023, one of the most important shows within the automotive aftermarket industry, which will take place in Las Vegas, NV from October 31 to November 2. In this edition, Cojali introduces the path to the future by presenting the latest innovations designed for all-makes repairers. Some of the most significant ones are:

### **New Advanced Technical Support Service.**

With an unwavering commitment to customer satisfaction, Cojali's Advanced Technical Support goes beyond the traditional support model. The new ATS has been specially designed in different levels to cater to the diverse needs of our clients, ranging from those who just needs helps with the software use or navigation (ATS Level I) to those who need further insights and advice to tackle complex repair challenges effectively (ATS Level II). This cutting-edge support service sets a new industry standard, providing our valued users with access to a team of certified technicians willing to offer M-F accessibility, real-time remote assistance, and extensive knowledge base.

### **Presentation of the Jaltest INFO WEB.**

Until now, only Jaltest users were able to access the technical and repair information when using their diagnostics tool. From 2023, this information gets available to every technician through a new web format, and regardless the diagnostics tool they use. Hundreds of thousands of repair guides, wiring diagrams, component locations and pictures, technical bulletins and much more is now available from any device with internet connection.

### **Launch of the 23.3 Version of Jaltest software.**

Jaltest All-Makes diagnostics tool for Commercial Vehicles continues to hold its position as the best All-Makes diagnostics tool for commercial vehicles. Strongly committed with the product development, Cojali launches the 23.3 software version which brings important innovations such as the wiring diagram for GHG21 Paccar modules; The complete model wiring diagram for Volvo VNX and Freightliner M2 Plus; New maintenance routines (oil filter reset and clutch reset) on Allison 6<sup>th</sup> Gen; A new complete system for 2023-2024 International vehicles (Navistar A26); More system variants for DT12 Transmission (TCM5) of Detroit Diesel; and many more.

Cojali is located in the booth J7432, at the Level 1 of the Venetian Expo, and invites all the assistants to visit its stand to know all the innovations first-hand. Pass by the booth and see a demo and ask about the future in diagnostics.
